

NALINAJ FERNANDO MEMORIAL AWARD FOR RESEARCH INTO PRIMARY IMMUNODEFICIENCY

Do you work in the field of primary immunodeficiency?

Are you considering where to submit your next manuscript?

If you submit to *Clinical and Experimental Immunology*,
we can offer you:

- Rapid and thorough peer review: editorial decisions are typically provided within 30 days of submission
- Fast production: 8 weeks from acceptance to print publication
- Publication in an international, high quality, multidisciplinary immunology journal
- The chance to win **£350!!**

All submissions to *Clinical and Experimental Immunology* in the field of primary immunodeficiency are automatically entered for the **Nalinaj Fernando Memorial Award**. This annual prize of £350 is awarded to the corresponding author of the best research article in this subject area.

This award has been generously donated by the Fernando family in memory of Nalinaj Fernando who died, aged 32, as a result of an extremely rare, genetic immunodeficiency disease called 'Bare Lymphocyte Syndrome', the only adult known to have the condition.

Full information on submission to *Clinical and Experimental Immunology* can be found at **www.immunology.org/cei**

Alternatively, you can contact the Managing Editor,

Dr Cate Livingstone
