How to submit your abstract using the online abstract submission system

Abstracts are required for all papers and posters. Abstracts MUST be submitted using the text entry template provided on the online system.

If you are submitting more than one abstract you can use the same email address and password for each abstract.

Preparation of your abstract

1. A “blind” selection process will be used. No identifying features such as names of hospitals, medical schools, clinics or cities may be listed in the title or text of the abstract. Do not include the names of authors either. The names of the authors and their affiliations (institutions) will be requested separately when you submit the abstract on-line.
2. The title should be as brief as possible. Please capitalise only the first word, not each one. There should be no full stop at the end. Please DO NOT use upper case for the title.
3. The abstract is a short description of your work and should contain all the elements necessary to define your goals and introduce your results.
4. Abstracts should state, in 250 words or fewer, briefly and clearly:
 - Aims/ Objectives
 - Content of Presentation
 - Relevance/Impact
 - Outcomes
 - Discussion
